

# Certifications Portfolio

Achieve your career goals  
and improve organisational efficiency  
through learning.

# IT & Digital Transformation

Optimise IT governance & Service Management to realise business change, transformation, and growth.

**ITIL®** is the most widely recognised framework for IT enabled services in the world. It supports organisations and individuals who want to gain optimal value from IT and digital services, embracing digital transformation.

**DevOps Institute** offers specialised learning focused on the human, process, and automation facets crucial to DevOps success. DOI certifications stand out for prioritizing cultural transformation and collaboration, providing a comprehensive learning experience tailored to modern organisational needs.

**Data Science** enables professionals to apply Data Science concepts, terms, and tools in real business cases, helping their management team to identify opportunities and make better decisions.

**DevSkills** validate candidates' coding skills in Java, C#, Python, JavaScript, VueJS, Angular and React, enabling them to prove they can write reliable, maintainable, testable, and portable code focusing on a full-stack mentality.

**Quality Software Development (QSD)** validates the necessary skillset to produce high quality code and build reliable quality software.

**COBIT®5** (Control Objectives for Information and Related Technology) is a globally accepted framework for the governance and management of IT, aligning business goals with IT processes and objectives.

**AgileSHIFT®** focuses on the importance of leading change in an organisation, taking a holistic view to prepare for transformational change by creating a culture of enterprise agility.

**RESILIA®** enables IT and business professionals to upgrade cyber security to balance risk, cost, benefits, and flexibility in their organisation.

**SDI®** (Service Desk Institute) provides internationally recognised standards for service desk and IT support professionals, forming the basis of Service Desk Analyst and Service Desk Manager qualifications.

## Project / Programme & Portfolio Management

Deliver successful projects of any size or complexity, for products and services that align with business objectives.

**PRINCE2®** is one of the world's most widely adopted and recognised project management methods, trusted and used by individuals and organisations in over 150 countries globally, across a range of roles and sectors, that can be tailored to meet your needs, empowering the delivery of successful projects.

**PRINCE2 Agile®** equips practitioners and organisations with the ability to deliver agile projects by tailoring the PRINCE2 project management method with a broad toolset of agile delivery techniques and frameworks.

**Scrum** is a lightweight framework that helps people, teams and organisations generate value through adaptive solutions for complex problems. Scrum Certification will enable you to master all aspects of the agile framework and the skills needed for you to start applying them to your daily work.

**MSP®** (Managing Successful Programmes) consists of a structured framework for organisations of all sizes and from all sectors to improve practices and offer better services.

**P3O®** (Portfolio, Programme and Project Offices) provides a universally applicable guidance that facilitates effective portfolio, programme and project management through enablement, challenge, and support structures.

**MoV®** (Management of Value) offers guidance on maximising value and making optimal use of resources. It has evolved from many years of successful value management practice.

**MoP®** (Management of Portfolios) provides an overview of portfolio management, including guidance on the principles, techniques, and practices to run alongside an organisation's business.

**M\_o\_R®** (Management of Risk) provides a framework for risk management considering the different aspects of an organisation: strategic, programme project, and operational.

## Business Excellence

Drive business process excellence to deliver better products, reduce costs & improve processes in their organisations.

**Lean Six Sigma** is one of the most popular business performance methodology in the history of corporate development, designed to improve customer satisfaction, performance levels, and time-to-market.

**Lean IASSC** focuses on Lean practices, principles, and tools typically used to reduce waste and improve process efficiencies in Manufacturing, Production, Office, IT and Development.

**Lean IT** is an extension of Lean practises and principles, applied in an IT environment, designed to continuously improve the value delivered by businesses and professionals alike.
