PeopleCert
DevOps.

Effectiveness & efficiency beyond comparison.

PeopleCert introduces **PeopleCert DevOps Qualifications** that offer a superior DevOps proposition. The new suite of PeopleCert DevOps Qualifications provides practical guidance on how to successfully apply DevOps in day-to-day work. Professionals can embark on a DevOps journey with three modules that support effectiveness in daily performance and are enriched with guidance on integration with IT operations practices, focusing value and quality.

Addressing organizations' real business needs

PeopleCert DevOps Qualifications help organizations close the skills-gap and support the realization of their business objectives. The training content provides practical guidance on how to apply DevOps and integrate it with existing IT operations activities. Additionally, the course can be customized to suit organizations' specific requirements.

Hands-on guidance for professionals

DevOps approach to work has become a sought-after resource across industries and a growing number of organizations are looking for DevOps-savvy professionals. PeopleCert DevOps Qualifications offer practical guidance to make the cultural shift happen, to work comfortably in a DevOps environment, and to manage an array of different technology and tools.

Certification scheme:

- **PeopleCert DevOps Fundamentals** (14-18 training hours). Candidates gain practical guidance on how to deliver effective DevOps through 15 essential practices, focused on well-established ITSM practices.
- **PeopleCert DevOps Leadership** (14-18 training hours). Candidates get guidance on how to lead the implementation of DevOps practices and how to achieve a cultural shift for better collaboration and communication.
- **PeopleCert DevOps Engineer** (14-18 training hours).
Get an in depth understanding of the key skills and tools necessary for today's DevOps Engineer. Become the enabler of DevOps success by fostering a culture of experimentation and an environment of learning that enables the rapid, frequent and reliable building, testing, and release of software.
- **DevOps Site Reliability Engineering** (18-24 training hours). Understand how to bridge the gaps between platform design, development and operational execution by providing new perspectives on system reliability. Learn how to build and improve service reliability and develop resilient infrastructures through effective application of DevOps.
- **DevSecOps** (18-24 training hours).
Learn about the typical security risks and their effective management through key practices which enable you to prevent and reduce such threats. Learn how to get started with DevSecOps and how to embed it to your everyday workflow.

Who is it for?

PeopleCert DevOps Qualifications are designed for professionals in Software or Applications Development, IT Operations, IT Service Management, as well as business analysts, project and product managers, and anyone aspiring to gain knowledge of DevOps principles.
